

Figure 02: County Level Comparison

Xiaoyi Zhao, Pragati Dahal, Yuanyuan Wen

2026-07-12

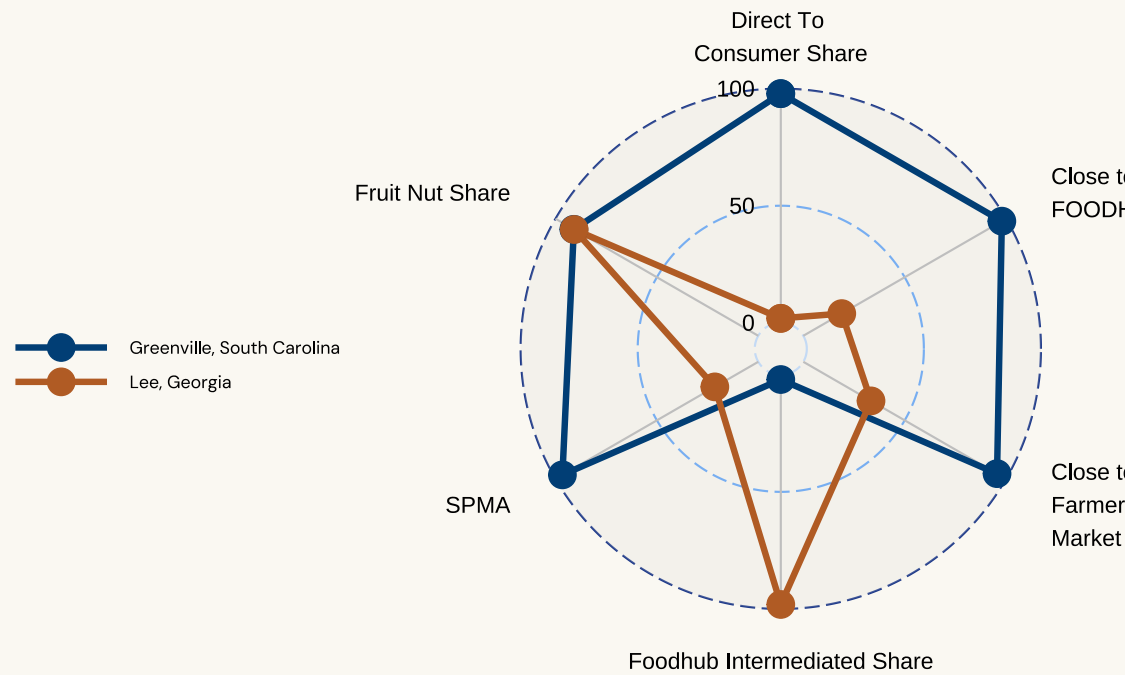

Purpose

1. the purpose of this file is to generate the county comparison plot
 2. The counties are choose are Greenville, SC vs Lee, GA
 3. We will plot county comparison first
 4. Then, we will plot the whatif case
- The index and the factors represented in the spider graph are percentile
 - Since local intermediate sale percentage has a lot of missing values, this county comparison use $(1 - (\text{direct to consumer sales' share}))$ as the the estimation of the food hub intermediated sale

Step 1: specify the font

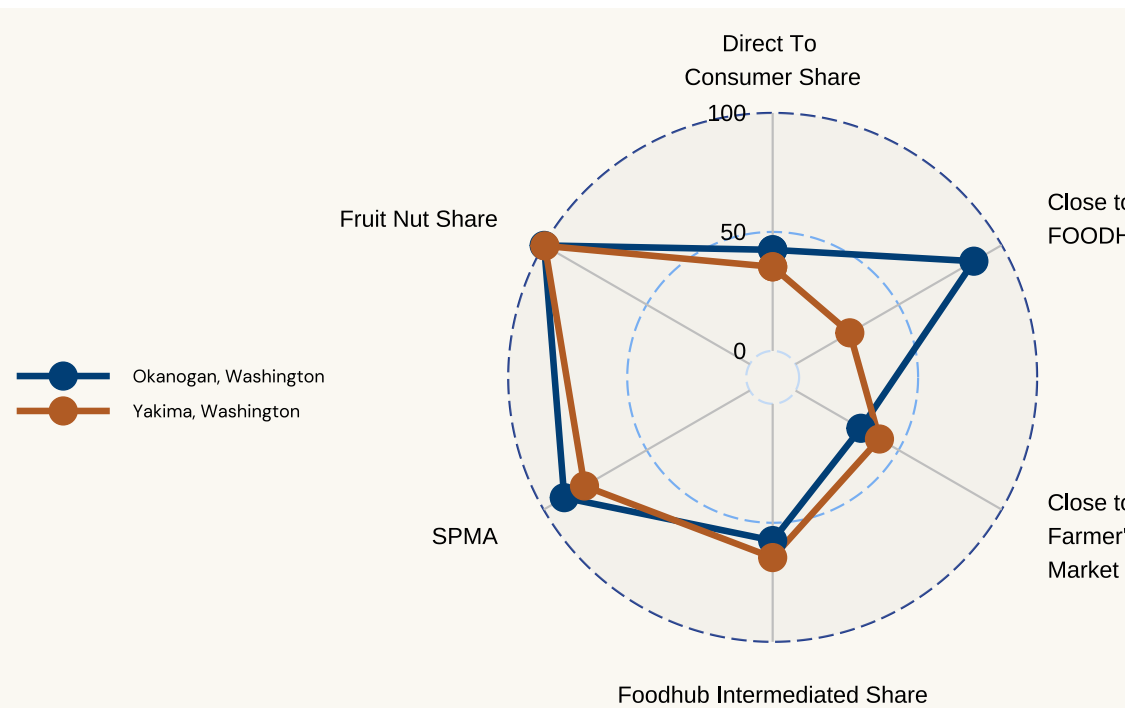

Step 2: County Comparison

Greenville, SC v.s. Lee County,GA

The Fips we identified are

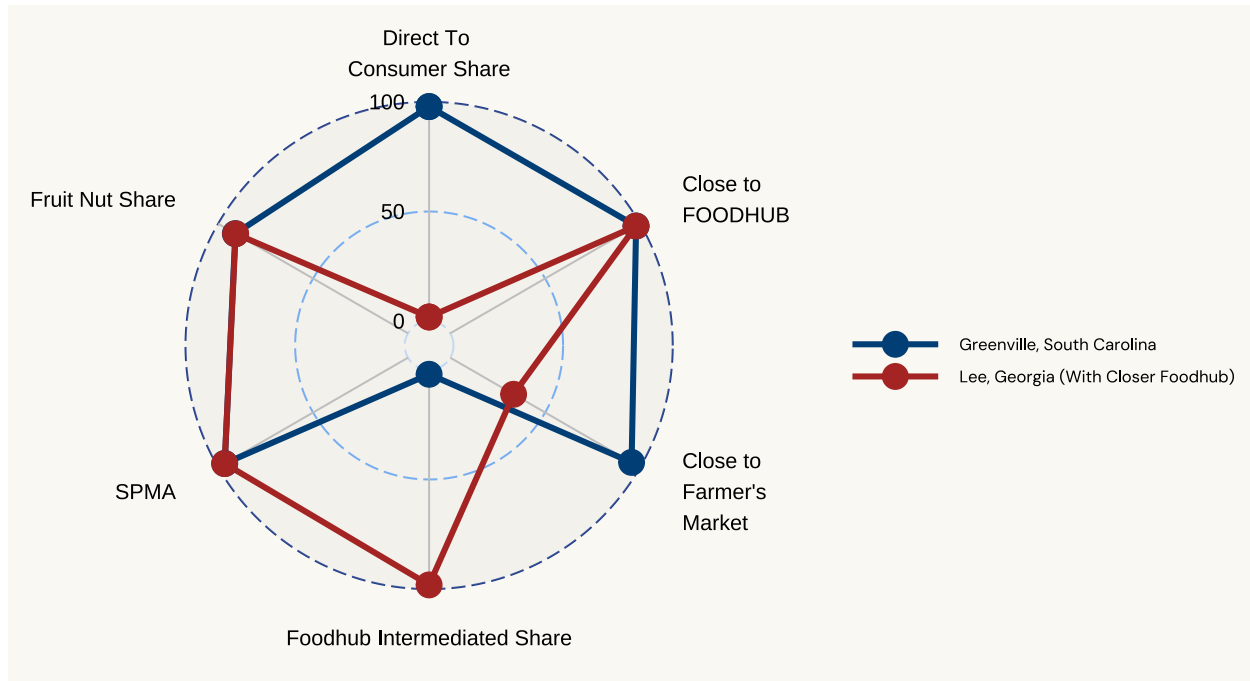

Yakima, WA v.s. Okanogan, WA

The Fips we identified are

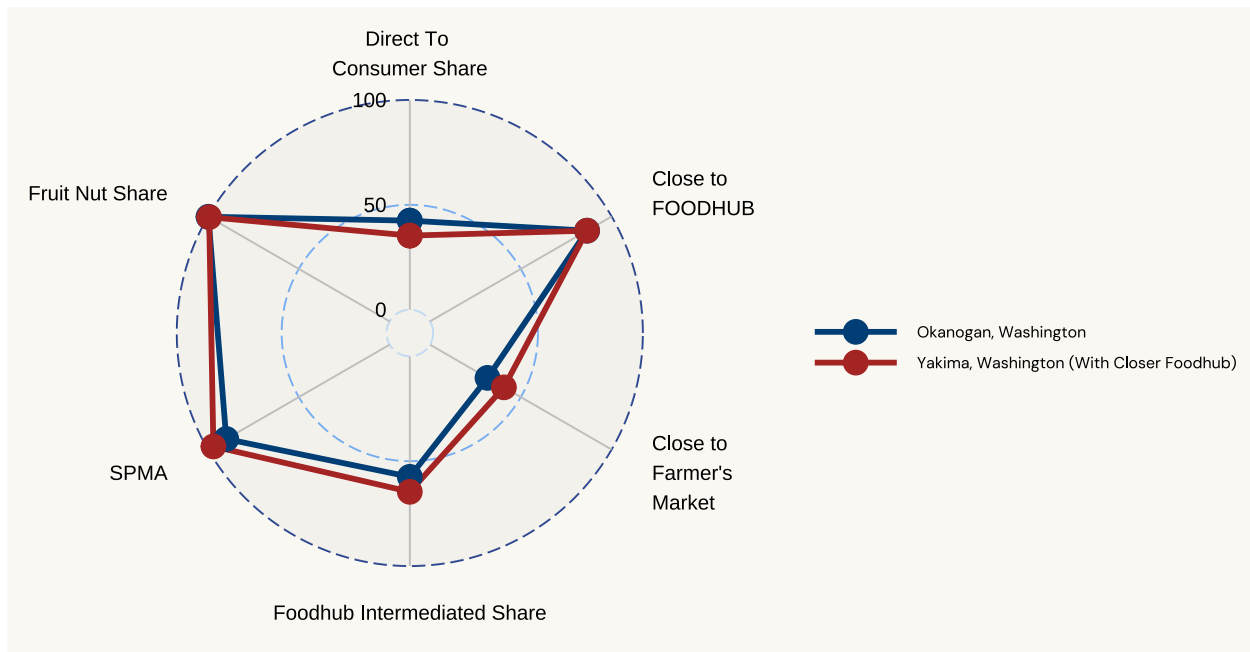

Step 3: Plot the graph over its whatif case 1

load the simulated data first

Step 4: Plot the graph over its whatif case 2: Yakima vs Okanogan in WA

load the simulated data first

add the figure for arrows between the figures

wrap the plot
